

Protect Your Customers from Online Fraud and Phishing Scams

More than \$150 billion was stolen in 2018 from customers. Are you doing enough to keep your customers safe?

Failure to safeguard the digital integrity of your customers has become your greatest reputational and financial risk. By ‘hijacking’ your brand identity and assets, attackers trick your customers into disclosing sensitive data and private information.

These ‘out of the perimeter’ threats could be hiding anywhere in the infinite web, and by the time they’ve come to your attention, it may be too late.

Protect your brand and your customers from online fraud and promote trust in your digital customer interactions.

Segasec’s Digital Threat Protection Solution *Patent-pending*

1 Proactive Intelligence
 Quadrillions of scans 24/7 identify brand-related manipulation and fraud.

DETECTION

2 Threat Detection Agent
 Powerful web agent uncovers non-brand related threats.

3 Remediation
 Lightning-fast automated Block and Take-Down takes the problem off your hands entirely.

RESPONSE

4 Mitigation
 Smart deception technology by a click of a button.

CISO of a Fortune 500 EMEA Bank

“Before working with Segasec, we detected only the tip of the iceberg of threats, and it took us days and sometimes weeks to take them down. Segasec’s proactive approach has allowed us to find threats no other anti-fraud tools found, stop them within minutes, and pre-empt attacks before they affect our customers.”

WHY SEGASEC

All In One Solution

Covering both detection and response

Entirely Managed Service

Taking the problem out of your hands entirely

Proactive Detection

As early as a hacker’s intent

Unique Deception Technology

Making stolen data unusable and leading attackers into traps

We Discover What Others Can't

Coverage of all phishing use cases

No Integration and Zero Onboarding

Start gaining value within minutes

ABOUT SEGASEC

Segasec is a Tel-Aviv based cyber-security startup providing end-to-end digital threat protection against consumer phishing attacks that originate in your blind spot - beyond the enterprise perimeter. Segasec’s patent-pending technology provides intelligence of upcoming attacks at the earliest possible preparation stages, running quadrillions of targeted scans that identify even unknown attack patterns. Segasec blocks compromised assets before they become a live risk, because once customer trust is broken, it’s already too late.
